\$20 Non-Members  
Lunch is included!

Fill out ASHRAE Membership Form and attend for free!  
**Students attend free!**

**Mike Ellis**  
Environmental Air Technology  
President

## Dust Collection NFPA Requirements

Presented by: Mike Ellis

This presentation covers NFPA 652, 664, 484, & 660 and the complex requirements they encompass. NFPA 660 is the new comprehensive standard for Combustible Dusts and Particulate Solids, which combines 652, 664, 484 into one standard.

Key components of NFPA 660 include dust hazard analysis, risk mitigation & safety, material-specific guidelines, training & documentation, and equipment standards.

We primarily focus on wood dust collection, but will also cover other types of dust & fume collection, along with an overview of their key safety concerns.

### Biography:

Mike has led Environmental Air Technology since 1989. Under his leadership, the company has expanded its territory to eleven states and evolved into a full-service provider of industrial air filtration equipment, system design, and engineered solutions.

With more than 30 years of hands-on experience, Mike specializes in dust collection system design, NFPA compliance, and air quality solutions for applications ranging from coolant mist and oil smoke to combustible dust.

Mike also leads Environmental Air Technology's training initiatives, partnering with engineering and architectural firms across the Midwest to deliver seminars on NFPA standards, dust collection fundamentals, and industrial ventilation design. He is an active member of the Nebraska ASHRAE chapter, continuing a family legacy of chapter leadership.

Outside of work, Mike can often be found at the Lake of the Ozarks, boating and spending time with family and friends.
